V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-6	YES
	Claims		NO
Inventive step (IS)	Claims	1-6	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-6	YES
	Claims		NO

2. Citations and explanations

In contrast to document DE-A-101 05 660, which is considered to be the closest prior art and which describes a method for extractive distillation in a separation column in which the selective solvent is introduced into both sub-sections of the column, claim 1 specifies, as a new feature, introduction into only a single sub-section. The new feature ensures that a combination of extractive and conventional distillation is carried out in a single column without a selective solvent, a particularly suitable combination for complex separation tasks. None of the cited documents is able to suggest this solution and therefore claim 1 complies with the requirements of PCT Article 33(2) and (3). The same reasoning applies to dependent use claim 6. The industrial applicability seems evident (PCT Article 33(4)).
